CONSULTING ENGINEERS & CONTRACTORS (PVT) LTD, commonly known as CEC, is a major construction company in Sri Lanka. Over the last 30 years CEC has grown from being a small independent contractor to a major construction and road development company. It has thus become one of the most recognized and trusted in the arena it specializes, and recognized as a dependable contractor with a very high rating for delivering projects with great quality and on-time.

Its core businesses include Design and Build Projects in the fields of Road Construction, high-rise buildings, Bridges, Structural and Architectural Design. Apart from these it operates Quarries, Crusher Plants, Asphalt Plants, Bitumen Plants and Concrete batching Plant.

Today the Company has been elevated to CS2 status of CIDA (Construction Industry Development Authority of Sri Lanka a Government Body), the highest grade that a Civil Engineering Company aspire to, in the construction arena. The company's relentless drive towards achieving quality of service saw the company achieve ISO 9001:2015, along with OHSAS 18001:2007 and ISO 14001:2015 which established CEC's credentials as a construction company in Sri Lanka which is quality conscious and customer centric.

”

As CEC establishes its presence as the Leader in Construction industry, its legacy of turning dreams into deeds, conceptions into substantiality, will continue to propagate.

“Turning Vision into Reality” stands not only as a corporate motto for the Company but beyond, it is about effectuating positive differences in all communities it serves.

Behind the success story of Consulting Engineers & Contractors (Pvt) Limited, a leading Construction Company, in Sri Lanka, is the vision of one man - Founder and Chairman, Eng. Ashoka Randeni. Eng. Ashoka Randeni is a Chartered Engineer [B.Sc Eng. (Hons) in Civil Engineering] by profession who graduated from University of Peradeniya Sri Lanka. This is the great personality who built the Company, Consulting Engineers Contractors (Pvt) Ltd., which goes as CEC, turning it into a leader in the Road Construction Field in Sri Lanka, and into a widely recognized name synonymous for commitment, integrity and excellence.

CEC has grown as a Construction company who excels in Design and Build Projects, and strengthened in leaps and bounds under his stewardship, with his visionary leadership. Matched only by his commitment to the business, Ashoka Randeni is equally passionate about the contribution to the development programs of the country and contribution to the society too, in keeping with the Company's Corporate Social Responsibility.

Visionary leadership, perceptive and transparent corporate policies, teamwork, has collectively shaped our path into what it is today - a leader in the respective area it specializes in. CEC is a member of National Contractors Association of Sri Lanka and The Institute of Engineers Sri Lanka (IESL)

Receptive to the emerging national needs, the company is committed to the road and building construction and rehabilitation projects currently underway across the country with the projects funded by Asian Development Bank, World Bank and JICA. The prestigious clientele are both Government of Sri Lanka (Road Development Authority, Urban Development Authority and Provincial Road Development Authority of Sri Lanka) and private organizations over a period of two decades.

The success factors that drive the Company's incessant growth are visionary leadership, perceptive and transparent corporate policies, sustainable construction practices, engineering excellence, social accountability, and teamwork. Above all, it is the Company's attention and contribution to Government's Development Programs and for the development of human capital that made it, what it is today - a leader in the respective field.

dig in the innovation

MINING & EARTH RESOURCES

To sustain unhindered supply, we have acquired a sprawling quarry complex in various parts of Sri Lanka. The stone quarry has vast reserves of granite. The bulk of our regular stone requirement is sourced from this stone pit.

We are engaged in continuous upgrading of the quarrying facilities to harness the true potential of our valuable asset. We have embraced cutting edge techniques to streamline the mining operations.

Advanced infrastructure (Machinery and Equipment) as well as technologies are in place within the quarry sites to execute the operations in tandem with international standard. We pride ourselves for being able to fulfil demand of any scale for crushed products without experiencing any problems and within committed deadlines.

We have the infrastructure, resource base, wherewithal, cutting edge technology, skilled manpower, transit provisions and latest facilities to conduct quarrying on large scale and meet all instantaneous and wholesale processed product demands.

We have advantage of the current and future earth resources facilities by being innovative and inventive business strategies and providing seamless offerings.

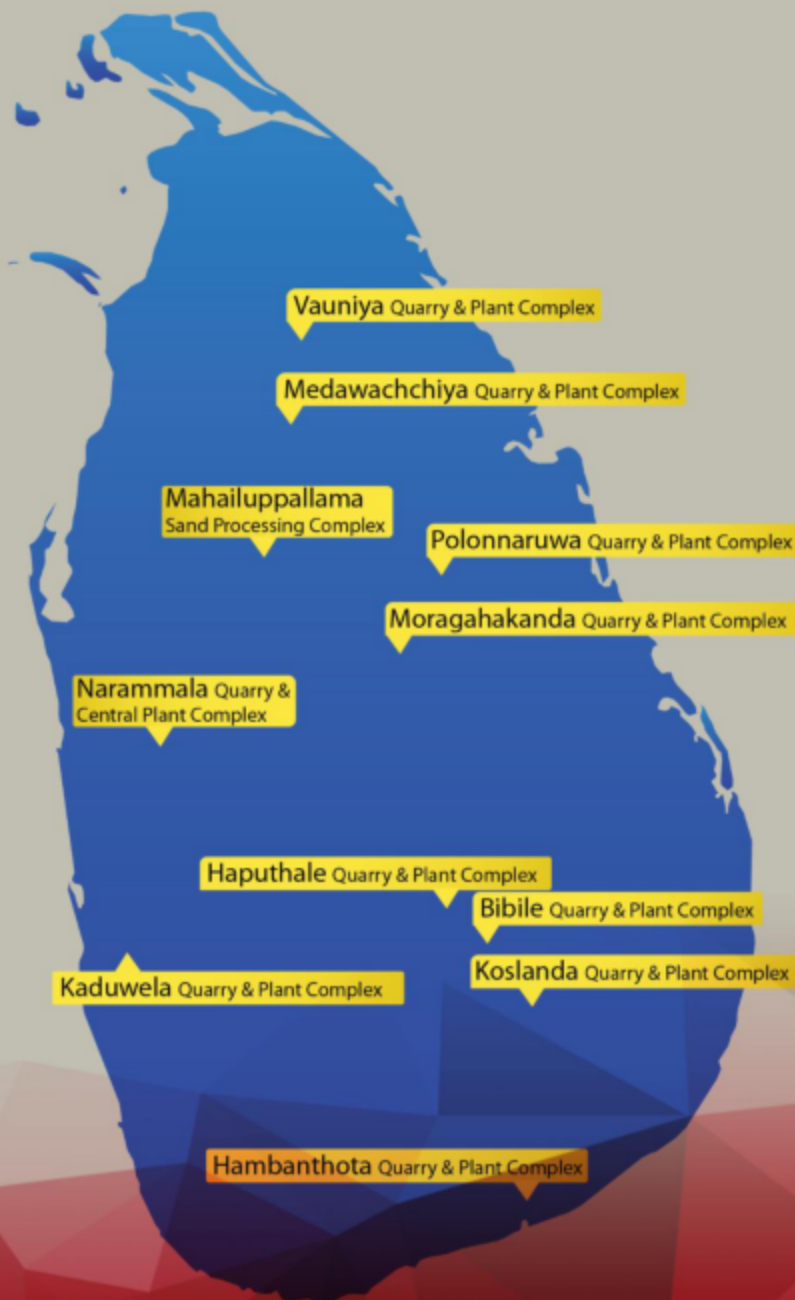

Understanding future business dynamics, CEC has established island wide quarry sites and plant complexes. This has enabled us to give high quality service and products at extremely competitive rates to our business partners.
